

Md Shahriar Hossain Zisan

Full-stack Developer

Barishal, Bangladesh | shahriarhossainbsl@gmail.com | +8801778601903 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Summary

Passionate Frontend Developer specializing in building modern and responsive user interfaces using React.js. With a solid foundation in full-stack development including Node.js and MongoDB, MySQL I possess a holistic understanding of the application lifecycle. Eager to apply my skills in a collaborative team to create intuitive and engaging user experiences that drive product success.

Technical Skills

Frontend: JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap,
Backend: Node.js, Express.js, REST API, JWT (JSON Web Token).

Tools & Others : Git & GitHub, VS Code,Vercel, Netlify Chrome DevTools, Postman,| Surge

Soft Skills : Communication | Adaptability | Learning Agility | Problem-Solving **Database:** MongoDB, MongoDB Atlas, MySQL.

Projects

1. ShopSmart AI – AI-Themed Full-Stack E-Commerce Platform [LIVE LINK](#) [GitHub \(Client\)](#) [GitHub \(Server\)](#)

Description: ShopSmart AI is a full-stack, premium e-commerce platform inspired by Amazon, Apple Store, and Nike — built with an AI-forward shopping experience, from an animated natural-language search hero to a complete catalog, cart, checkout, and admin management system.

Technologies: React.js | TypeScript | Node.js | Express.js | MongoDB | Mongoose | JWT | Stripe | Cloudinary | Tailwind CSS | DaisyUI | Zustand | TanStack Query | Framer Motion

Key Features:

- **Full Shopping Flow** – Product catalog with search, category/price filtering, sorting, and infinite scroll; persistent cart and wishlist; coupon codes applied live at checkout.
- **Secure Payments & Order Lifecycle** – Stripe Checkout integration with webhook-based order fulfillment, automatic stock deduction, and a full order-status pipeline from Pending through Delivered.
- **Role-Based Dashboards** – Dedicated customer experience (orders, wishlist, profile with avatar upload) versus a full Admin Dashboard (revenue analytics, best-sellers, low-stock alerts with inline restocking, order status management, coupon and product/category CRUD).
- **Reviews & Trust** – Star-rating reviews with automatic aggregation and rating-distribution breakdown on every product.
- **Secure, Production-Deployed Auth** – JWT access/refresh token flow with role-based access control, deployed live across Vercel (frontend) and Render (backend) with production-hardened CORS and cookie policies.

2.MediQueue – Tutor Appointment & Queue Management Platform [Live Link](#) | [GitHub \(Client\)](#) | [GitHub \(Server\)](#)

Description: MediQueue – A specialized digital booking platform designed to streamline tutor appointments, manage student queues, and optimize academic consultation schedules with real-time tracking.

Technologies: React.js | Node.js | Express.js | MySQL | BetterAuth | Tailwind CSS | DaisyUi | Prisma **Key Features:**

- **Dynamic Slot Booking & Queue System** – Allows students to browse tutors by subject, view live availability, instantly book consultation slots, and monitor their real-time queue status.
- **Secure Session Management** – Integrated Better-Auth for robust, multi-layer student/tutor authentication, supporting secure route protection and seamless session handling.
- **Role-Based Workflows** – Designed dedicated interfaces for Students (to track active bookings and queue numbers) and Tutors (to organize availability timelines and manage student queues efficiently).

3.🍌 Project Jackfruit | SunCart 🛒 [Live Link](#) | [Github](#)

Description: SunCart is a modern, high-performance E-commerce storefront designed for speed, security, and a seamless user experience. From a sleek glassmorphic UI to robust Google OAuth integration, it demonstrates a complete full-stack workflow. **Technologies:** React.js | Next.js | Express.js | MongoDB | BetterAuth | Tailwind CSS | Lucide icons **Key Features:**

- ⚡ **Edge-Ready Performance:** Built with Next.js 15 (App Router) for optimized server-side rendering and static generation.
- 🔒 **Secure Authentication:** Integrated with Better Auth, featuring Google Social Login and secure session management.
- 🎨 **Designer UI:** A beautiful interface crafted with Tailwind CSS and DaisyUI components for a responsive, modern look.
- 🗄️ **Scalable Database:** Powered by MongoDB Atlas for flexible and reliable product data storage.
- 📱 **Mobile First:** Fully responsive design that looks great on everything from iPhones to 4K monitors.

Education

BSC in Computer Science and Engineering

Dec 2027 (Expected) University of Barishal,Barishal

Complete Web Development
With Programming Hero
